Application/Control Number: 10/607,890

Art Unit: 1623

The amendment to the claims filed June 27, 2003 is an improper form in that a

clean copy of all the pending claims along with the marked copy of the amended claims

have not been provided.

Claims 1-4, 6-11 and 17-53 are rejected under 35 U.S.C. 112, second paragraph,

as being indefinite for failing to particularly point out and distinctly claim the subject

matter which applicant regards as the invention.

The term "derivative" (claim 1) renders the claims indefinite since the

specification fails to state what is encompassed by said term i.e. the scope of the

invention cannot be determined.

The terminology "selected from the group comprising" (claims 1, 6, 17, 31-34 and

44-51 all occurrences) is an improper Markush terminology. Such terminology as

"selected from the group consisting of" can be used to overcome the rejection.

Regarding claims 1, 6,17, 31-34 and 44-51 the phrase "e.g." renders the claim(s)

indefinite because the claim(s) include(s) elements not actually disclosed (those

encompassed by "or the like"), thereby rendering the scope of the claim(s)

unascertainable. See MPEP § 2173.05(d).

The claims are also indefinite because there is no antecedent basis in the

structural formula (I) for solamargine and solasonine.

Claims 6, 17, 44 are indefinite in that the structural formula (I) has not been set

forth.

Application/Control Number: 10/607,890

Art Unit: 1623

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-53 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over the Australian Patent No. AU-B-57853/80, the International Patent No. 91/10743 or the International Patent No WO 00/61153.

Each of the Australian Patent and the International Patents discloses at least two glycoalkaloids of formula I. Note that the Australian Patent discloses the use of said

Art Unit: 1623

compositions for the treatment of cancer and psoriasis and the International Patent WO 00/61153 discloses the use of said composition for the treatment and diagnosis of cancers. The International Patent WO 91/10743 further disclose said composition in combination with a detectable label (see, for example, page 10). The claimed compositions and methods are anticipated by the Australian and the International Patents. In addition, if there are any differences between the claimed compositions and methods and the prior art compositions and methods, the differences would appear to be minor in nature and the claimed compositions and methods, which fall within the scope of the prior art's compositions and methods, would have been prima facie obvious from the said references' disclosures to a person having ordinary skill in the art at the time the instant invention was made.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elli Peselev whose telephone number is (571) 272-0659. The examiner can normally be reached on 9.00-5.30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Wilson can be reached on (571) 272-0661. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
